About Sanjeev WeBuilds.

Based in the vibrant coastal city of Thoothukudi, Tamil Nadu, India, Sanjeev WeBuilds is a premier software development partner dedicated to transforming business operations through tailored technology. We specialise in engineering robust, custom ERP solutions, management platforms, and bespoke business software systems designed to solve the unique challenges of modern enterprises.

We believe that software should adapt to your business, not the other way around. Unlike rigid, off-the-shelf templates that force you to compromise your workflows, we design and build every application from the ground up. Our solutions cater to a diverse array of sectors, including educational institutions, healthcare clinics, hospitality, retail chains, and automotive service centres.

Our collaborative development process keeps clients fully informed at every stage, from initial requirement discussions to planning, prototyping, deployment, and ongoing maintenance. By putting transparency and engineering excellence first, we deliver reliable, scalable, and secure systems that drive tangible growth.

What We Build

- ✓ Custom Enterprise Resource Planning (ERP) Systems
- ✓ Point-of-Sale (POS) Billing & Compliance Software
- ✓ Dynamic Member & Subscription Management Engines
- ✓ Automated Booking & Operations Portals
- ✓ Healthcare Scheduling & Electronic Records Management
- ✓ Comprehensive Inventory & Multi-Warehouse Tracking Systems

Key Features

- ✓ GST-compliant invoice generation
- ✓ Ledger, accounts & party management
- ✓ Expense & purchase tracking
- ✓ Multi-branch/multi-user support
- ✓ Inventory-linked billing
- ✓ Profit & loss/financial reports
- ✓ Secure cloud backup

Best Suited For: Retailers, traders, service businesses & accountants.

Interested in Ledger / Billing Software?

Let's build a tailored package to meet your workflow requirements.

+91 93441 66190

sanjeevwebuilds@gmail.com

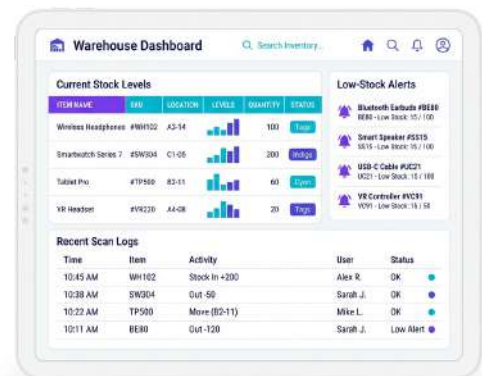

Overview

A real-time inventory and warehouse control system tracking stock movement across locations.

Key Features

- ✓ Real-time stock tracking
- ✓ Barcode/QR-based scanning
- ✓ Purchase order & vendor management
- ✓ Low-stock & reorder alerts
- ✓ Multi-warehouse/multi-location support
- ✓ Goods inward & outward logs
- ✓ Inventory valuation & analytics reports

Best Suited For: Warehouses, distributors, manufacturers & retailers.

Interested in Warehouse / Inventory Management?

Let's build a tailored package to meet your workflow requirements.

+91 93441 66190

sanjeevwebuilds@gmail.com

Overview

An operations system for garages and service centres to manage job cards, spare parts and customer follow-ups.

Key Features

- ✓ Digital job card creation & tracking
- ✓ Vehicle & service history records
- ✓ Spare parts inventory management
- ✓ Billing, estimates & invoices
- ✓ Automated service-due reminders
- ✓ Technician assignment & workload tracking
- ✓ Customer & vehicle database

Best Suited For: Automobile garages, service centres & workshops.

Interested in Vehicle Service Centre Management?

Let's build a tailored package to meet your workflow requirements.

+91 93441 66190

sanjeevwebuilds@gmail.com

Overview

A lightweight ERP for tutors and coaching centres organising batches, fee collection and student performance.

Key Features

- ✓ Student enrolment & batch management
- ✓ Fee collection & payment reminders
- ✓ Attendance tracking
- ✓ Class scheduling & timetable
- ✓ Performance & test-result tracking
- ✓ Parent communication portal
- ✓ Online assignments & test module

Best Suited For: Private tutors, coaching centres & tuition institutes.

Interested in ERP for Home Tuition?

Let's build a tailored package to meet your workflow requirements.

01 Requirement Discussion

We begin with structured, in-depth consultations to thoroughly understand your business goals, workflows, and exact pain points.

02 Planning & Strategy

We define the software architecture, select technology stacks, draft clear feature scopes, and map out milestones for delivery.

03 Design & Development

We architect intuitive user interfaces and develop clean, custom code using the latest industry standards and frameworks.

04 Testing & Optimisation

We perform rigorous quality assurance, security audits, and speed optimization to ensure the software runs flawlessly on all devices.

05 Launch & Deployment

We set up cloud hosting, migrate databases, handle secure integration configs, and launch your systems live for operation.

06 Ongoing Support

We stand by you with post-launch updates, routine security backups, bug fixes, and 24/7 technical query resolution.

Why Businesses Choose Us.

Custom-Built Systems

Every solution is tailored to your operations, eliminating unnecessary bloat and matching your exact business workflows.

Mobile-Friendly

Clean, responsive user interfaces that adapt beautifully across smartphones, tablets, laptops, and desktop screens.

Fast & Reliable

Optimised frontend and backend structures built for high speeds, minimal load latency, and maximum uptime.

Secure by Design

Built with secure auth, data encryption, regular cloud backups, and compliance with the latest web standards.

Transparent Process

We communicate regularly through live links, weekly demos, and detailed timelines so you're always in the loop.

Dedicated Support

Direct access to our support desk for updates, training, and troubleshooting, ensuring zero downtime.

Technology & Tools We Use.

Frontend

HTML5, CSS3, Modern JavaScript (ES6+), React.js, Tailwind CSS (optional)

Backend

Node.js, Express, Python (Django/FastAPI), PHP (custom routing)

Database

PostgreSQL, MySQL, Supabase, MongoDB (NoSQL)

Hosting & Security

AWS, Vercel, DigitalOcean, Cloudflare (SSL/DDoS protection), Docker containers

Integrations

Razorpay / Stripe gateways, Twilio SMS API, WhatsApp Business API, Firebase

Design

Figma (UI/UX prototyping), Adobe Illustrator (vector design)

Let's Build Something Great Together.

Partner with us to create custom software engineered
specifically to drive your business efficiency and operational
scaling.
